SUMMARY

Recent CSIT graduate with a strong interest in backend development and enterprise application architecture. Eager to build a career in .NET development, with a solid foundation in programming fundamentals, object-oriented design, and database concepts gained through academic coursework and projects. Motivated to learn ASP.NET Core, C#, and related technologies, and to grow as a backend developer in a professional software development environment.

EDUCATION

Central Campus of Technology, Dharan

2022 – 2026

Bachelor of Science in Computer Science & Information Technology

- Relevant Coursework: Software Project Management, DSA, OOP, Web and Networking Database Management Systems, Software Engineering

Dharan Adarsha Secondary School, Dharan

2019 – 2021

Higher Secondary Education (+2) in Science

EXPERIENCE

Frontend Intern at Udaan Tech Solution

Dec 2025 – Feb 2026

- Developed responsive and reusable UI components for a SaaS-based Consultancy Management System using React.js.
- Implemented form validation and dynamic UI states for client onboarding and booking workflows.

Projects

SneakersZone – Full-Stack E-Commerce Platform | *Java, Spring Boot, React, PostgreSQL, Docker*

[GitHub](#)

- Built a full-stack sneaker e-commerce app with a layered Spring Boot REST API, JWT authentication, and role-based access for user/seller/admin.
- Implemented cart, orders, eSewa/Khalti payment integration, and admin analytics; containerized the full stack with Docker Compose.

AI Chatbot | *React, Vite, Google Gemini API, OpenAI API*

[GitHub](#)

- Built a React chat interface integrating Google Gemini and OpenAI APIs behind a common assistant class for swappable LLM providers.
- Handled async message streaming, loading states, and error fallback for a responsive real-time chat experience.

Book Store | *ASP.NET Core MVC, EF Core, C#, SQL Server*

[GitHub](#)

- Implemented CRUD operations for managing books with Razor views following the MVC design pattern.

Event Listing Website | *ReactJS, Tailwind CSS*

[GitHub](#)

- Built a responsive event listing site with reusable cards, filters, and navigation for browsing event details.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, C#

Backend Technologies: ASP.NET, Spring Boot, RESTful APIs

Databases: MySQL, PostgreSQL, SQL Server

Tools & Technologies: Git, Postman, Docker, Cloudinary, Google Gemini API, OpenAI API

POSITION OF RESPONSIBILITY

Member at Union of CSIT Students

Dec 2023 - Jan 2025

Central Campus of Technology

Dharan

- Actively participated in organizing technical events, workshops, and seminars to promote collaboration among CSIT students.
- Assisted in coordinating with faculty and student representatives to improve academic and extracurricular experiences.
- Supported event logistics, communication, and outreach for department-wide student initiatives.
